

MissionConnect™ is a new and comprehensive database management software package for United Methodist Conferences. MissionConnect contains all of the functions our customers have come to expect from Great Spirit Systems over the past 14 years, and offers expanded functionality with the added ease and convenience of Internet access and cloud based data storage.

 **Main**
MissionConnect: Main provides secure access to all MissionConnect applications through login and permissions based data access assigned to each user.

 **Center**
MissionConnect: Center supports the maintenance of professional clergy data and records, laity records, conference and district committees and other groups, local church leadership and a host of functions dependent upon the accurate maintenance of this data.

 **Communicate**
MissionConnect: Communicate provides users with the ability to target specific groups of people for mailings and email communications, based upon leadership positions, geographic areas, churches, demographic and many other criteria. Bulk email communications can be generated, mailing labels and envelopes can be printed and spreadsheets along with combination output can be created.

 **Report**
MissionConnect: Report is an online report application designed to provide users the ability to either view or print specially formatted reports from all areas of the database. Report data can also be exported to spreadsheets.

 **Lead**
MissionConnect: Lead provides cabinet decision support through compiling data from all clergy for easy cabinet viewing and access. Customized profile and assessment tools for the charges, churches and pastors may be created for your conference.

 **Protect**
MissionConnect: Protect is a tool for tracking those individuals in your conference who have been trained in youth protection training, including the Safe Sanctuaries program or other conference programs of a similar nature. It is also designed to be used for tracking Clergy boundary awareness training.

 **Benefits**
MissionConnect: Benefits provides benefits management and billing options for participants of CRSP/ CPP, medical insurance, life insurance, flexible benefits, UMPIP, vision insurance, dental insurance, H.S.A., Medicare Part D and other benefits as required by the customer.

 **AdminTools**
MissionConnect: AdminTools provides MissionConnect Administrators the ability to assign and manage user access to applications, forms and specific data, including both read-only and read-write access or no access. It also provides password management.

 **Coming Soon!**
Additional applications are in design stages for Event Registration, Church Remittances, Church Statistics and an exciting new tool for local churches to view and submit church data to the conference.
