

FTP Site for GSS not accessible

- Open your Internet Explorer, or other web browser.
- Select "Tools" from the menu items
- Select "Internet Options"
- Click on the "Advanced" tab
- Check to make sure there is a check-mark in front of the "Enable Folder view for FTP sites" option as seen below. This allows access to FTP site use.
- Click "Apply" and "OK"
- Try accessing the ftp.greatspirit.com site again. If the Logon screen appears for you to enter a Username and Password, the problem has been resolved.
